

Revoria Flow EC21 Print Server

Make more opportunity for growth.

As your production environment grows and application complexity increases, your workflow needs to do more than process files—it needs to orchestrate them. The Revoria Flow EC21 Print Server delivers the pro-level automation, color management and processing you need to power your Revoria EC2100 / EC2100S Press towards a more profitable future.

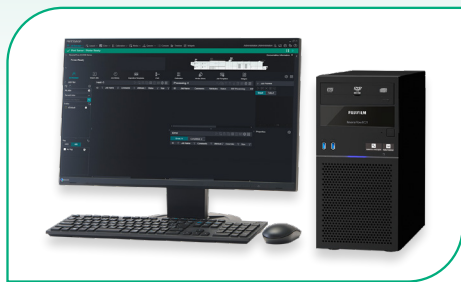

Make more of what matters...

Premium applications: Support for eye-catching, profit-driving 5-color jobs using Pink, Gold, Silver, Clear, White or Textured Clear Toners—in addition to CMYK.

Margin: Reduce costly waste and rework through smarter automation and precise color and image quality controls.

Visibility: Manage jobs with greater predictability in connected production environments.

Operational discipline: Standardize setups and improve repeatability, shift after shift.

Key features:

AI-based photo quality optimization intelligently optimizes print quality settings based on the types of images in each job, automatically improving skin tones, brightness and sharpness to achieve the best printed output.

Built-in Pink, Gold and Silver-based color libraries make it easier to enhance provided jobs and meet customer-specific color requests right at the press.

Automatic image quality adjustments including gradient correction, edge enhancement and bold text definition ensure reliably excellent output, job after job.

Key specifications:

Revoria Flow EC21

Processor Intel® Xeon® E-2226GE Processor (3.4- 4.6 GHz)

Operating System Windows 10 IoT Enterprise LTSC 2021 (64bit)

RAM Memory 32 GB (Max. 32 GB)

Disk Drive(s) HDD: 4 TB (System)
SSD: 1,920 GB (Max. 3,840 GB, optional)
DVD Multi Drive

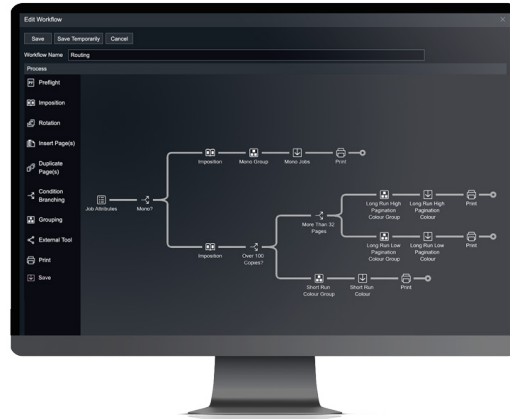

APPE APPE 6

Dimensions (WxDxH) 305mm (12.0") x 603mm (23.7") x 515mm (20.3")

Weight 9 kg (19.84 lbs.)

5th Color Support Included

Supported Presses EC2100 / EC2100S

Add prepress automation to your print server.

Our optional Revoria XMF PressReady Lite software allows smaller shops to automate complex prepress tasks from one spot. It preflights files to catch and correct issues like low-resolution images, RGB color use and missing trim or bleed settings. It also groups similar jobs to optimize production and supports single-press setups with enterprise-level automation.

The result is less manual intervention, fewer errors and a standardized, high-quality workflow ready to help you make more in less time.

Revoria XMF PressReady Lite automatically:

- **Checks** supplied PDF files
- **Fixes** common issues found in PDF files
- **Groups and imposes** jobs for production
- **Generates email notifications** when issues are found
